

Care for your farm with financial services from Co-operators

Farmers like you know that if you want something to grow, you've got to care for it.

As a company proudly founded by farmers, you can count on Co-operators for the personalized care to help your farm grow.

Our financial advisors are not just service providers.

They're partners who are invested in your success.

They'll visit you on site to evaluate risks, provide financial advice, and tailor solutions to your unique situation.

Working within your budget, we offer discounts for your farming experience, for your claims-free history, and for bundling other insurance and financial products.

Plus, if you belong to one of our members, you can enjoy increased savings and enhanced coverage on farm insurance and more.

Our history with the Canadian farming community gives us the insight to help farmers protect their assets and prepare for the future.

That's why we offer solutions like Flex Guard™, which can help you make the most of your policy by combining coverage limits, and our Farm Defender program with a premium discount, which can detect electrical hazards to help prevent fires.

We also offer estate planning advice for smoother transfer of your farm assets.

As your proactive partner, we offer preventative solutions like our TomorrowStrong™ endorsement, providing you with coverage for installing more climate-resilient repairs to your farmhouse after a claim.

Let us help you give your farm the care it deserves so that it can grow into all it can be.

Talk to a Co-operators financial advisor today to find out what our care can do for you and your farm.
